

MICRO CONTROL NEEDLE VALVE.

E series needle valves- MODEL:ENV-1

These Needle Valves is compact and reliable single seal and replaceable needle seating.

Body material: Nickel plated assembly

Needle: stainless steel needle.

A measuring dial with clear marking of 100 equal divisions denoting 0-3000cc (6 to 7 turns of the needle), are mounted on the valve. The flow rate is maintainable at 10^{-6} torr against the atmosphere. These valves are used for high repeatability and constant flow rates.
