

DRY VACUUM PUMPS

Dry scroll vacuum pumps

Based on the advanced technology of vacuum pumps abroad, this dry scroll vacuum pump is researched and developed by our experienced technicians. It is an environmental vacuum pump with reasonable price. This type will be the trends in the future.

Application:

Medical instruments, biologicals, pharmacy, food industry, medical packing, oil vapour recycle, film Preparation, semiconductor, micro-electronics, solar energy, etc.

Characteristics Description:

Environmental , no oil, no water, no pollution, with clean vacuum.

Easy to operate, convenient maintenance.

Low energy consumption.

Advanced in pumping water vapour.

The things which it pumps can be recycled.

Compact construction, easy to install and move.

Air cooling.

Less vibration, low noise.

Wider working vacuum, can continue working from the ultimate vacuum to the high atmospheric pressure

Spares: sealing elements, shaft seal, bearing, lubricating grease

Technical Datas :

TYPE	pumping speed		Ultimate Pressure (torr)	Power (Kw)	Rotational speed (rpm)	Inlet Diam (inch)	Outlet Diam (inch)	Weight (kg)	Noise dB (A)	Dimension (CM)
